KLEEMANN
Your 1st Choice in Lifts

Our story & heritage

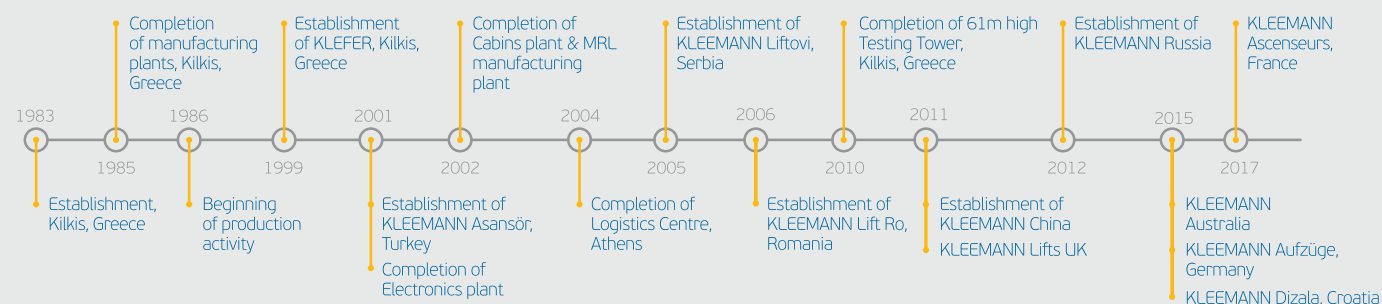

Founded in 1983 in Kilis, Greece, KLEEMANN is one of the major lift companies in the European and global market, providing any type of residential or commercial passenger and freight lifts, escalators, moving walks, accessibility and marine solutions, parking systems and components.

Its distribution network expands to more than 100 countries, with local presence in 15 of them.

KLEEMANN stands for innovation in design and technology, for flexibility and pragmatic thinking, for quality products and dedicated service and support.

Integrated manufacturing facilities, highly trained workforce and state-of-the-art IT systems and logistics support enable KLEEMANN to deliver reliable, highly personalised solutions, whatever the challenge.

KLEEMANN timeline

WE ARE THE GLOBAL LIFT SUPPLIER WITH THE BEST PRODUCT RANGE IN THE WORLD

WE ARE EXPERTS IN SPECIAL PROJECTS

WE OFFER WORLD CLASS DESIGN

countries around
the world

We have a local
presence in
15
countries
around the world

KLEEMANN Group facilities
cover an area of 255.000 m²
in land and 140.000 m²
in buildings globally.

● MANUFACTURING FACILITIES ● LOCAL PRESENCE

Eco-friendly

Energy saving product which reduces CO² emission up to 60% using a 1100W motor with only 6 Amperes rated current, stand-by-mode and led lighting.

Low noise levels

Gearless motor and state-of-the-art inverter combined with innovative design guarantees remarkably low noise levels inside and outside the cabin. The noise level inside the cabin (measured according to ISO 18738) during the lift operation reaches 52-54 dB (A).

Outstanding ride quality

Premium quality and exceptional ride comfort are delivered by both a gearless motor and a state-of-the-art inverter.

Self-supported shaft

Maison T Basic SP and Maison T Plus SP are offered with aluminum construction, self-supported or fitted on to the wall, where concrete shaft is not available.

Emergency evacuation

In the unlikely event of power failure, the emergency evacuation system ensures the safe transportation of passengers to the nearest floor.

Maison T Basic SP

Technical Specifications

Rated Load (kg)	180-450
Suspension	2:1
Machine room	MRL
Max travel (m)	12
Max number of stops	5
Max rated speed (m/s)	0,3
Min pit depth (mm)	300
Min clear headroom (mm)	2700
Max entrances	3
Panoramic option	Yes
Door Option	Semi-automatic
Directives & Standards	AS1735.18. Passengers lifts for private dwellings – Automatically controlled

Maison T Plus SP

World class design

Since 2007, KLEEMANN has launched its creative research, in cooperation with the industrial designer Andreas Zapatinas. That was the beginning of a new era. Through this rewarding partnership, new technical and aesthetic solutions were explored and developed.

Inspired by human needs, KLEEMANN focuses on shaping new space qualities that lift the passenger's mood and stimulates interaction inside the elevator.

Our cabins

KLEEMANN Design is about life. Going far beyond the elevator design, KLEEMANN cultivates a whole design culture that elevates each and every aspect of its operation. It is a way of thinking, a mindset of innovation.

Rather than thinking of the elevator as a box, KLEEMANN Design thinks of it as a unique space in the building and transforms the whole elevator experience into a new value for the people, the bulding, the environment.
